WattChop | API

BUILD FREE. PAY WHEN YOU GO LIVE.

One engine for sizing, dispatch and flexible load, behind an API and an MCP server. Explore and build at no cost. The meter starts when your sites do.

THREE APIS, ON THE STACK YOU ARE BUILDING

DESIGN AND PROPOSAL

SIZING

"What battery, and how big?" Send a year of load or 12 monthly bills. Get the recommended PV and battery, the savings curve, and both savings figures: a fixed timer, and Tariff Smart, powered by WattChop.

INSTALLED SYSTEM

DISPATCH

"What should this battery do?" Send the site's load, system size and tariff. Get an optimized charge, discharge and idle schedule to run on your own EMS or hardware.

FLEXIBLE LOADS **COMING SOON**

FLEX LOAD

"How much can this site draw tomorrow?" Get an hourly power budget, sent a day ahead, set against the tariff, solar, battery and grid events. Built for data-center compute and EV fleets.

ANY AI

THE MCP

Connect Claude, Cursor or your own agent to the same engine. Drop in a bill, ask for a system, then ask what-ifs: a bigger battery, another tariff, an EV charger. Answers in about a minute, with both savings numbers. **Same key, same wallet. No key needed to explore.**

FOUR WAYS IN

EXPLORE

NO KEY · FREE

Playground, Tariff Catalog, load Synthesizer and the MCP on verified public tariffs and demo loads.

BUILD

SANDBOX KEY · FREE

The full API and MCP on your own data. Results stamped "Sandbox", daily cap. Build your integration here.

SIZE

25 PROJECTS/MO · FREE

Real proposals with "Battery sizing by WattChop" on them. Need more? Org License, or one pull per project.

GO LIVE

PREPAID PULLS

Dispatch, Flex Load, white-label and volume. Bundles from $500. Pricing on the back.

EVERY WHAT-IF, ONE PROJECT

A project is one site's load for 30 days. Resize it, swap tariffs, add a charger, change constraints: it all counts once, up to 50 runs. A new site is a new project.

ORG LICENSE $6,000/yr

Unlimited attributed sizing for everyone at your company, in the app, the MCP and the API, under fair use. Hand it to your sales engineers for every inbound call.

PULL PRICING · ONE WALLET

COMMIT MORE. EVERY PULL COSTS LESS.

WattChop | API

A pull is one paid run: a Dispatch schedule, a Flex Load day-ahead budget, a white-label sizing project, or a sizing project past your free 25. The app, the MCP and the API all draw on the same prepaid wallet.

PULLS / YEAR	STANDARD	PER PULL	WHITE-LABEL	OVERAGE, STD	OVERAGE, WL
10	$500	$50	$750	$45	$67.50
100	$4,500	$45	$6,750	$40	$60
500 ▲	$20,000	$40	$30,000	$30	$45
1,000	$30,000	$30	$45,000	$15	$22.50
5,000	$75,000	$15	$112,500	$10	$15
10,000	$100,000	$10	$150,000	$5	$7.50
PLATFORM AND FLEET · KEEPS "POWERED BY WATTCHOP"					
25,000	$125,000	$5	Negotiated	$2.50	Negotiated
100,000	$250,000	$2.50	Negotiated	$1.25	Negotiated
500,000+					Structured individually

Overage is always the next tier's per-pull rate. ▲ 500 and up: priority queue. White-label removes the WattChop mark at a 50% premium and lets you choose which savings figure to show.

HOW MANY PULLS DO I NEED?

Monthly dispatch = 12 pulls a site a year · weekly = 52 · daily or Flex Load = 365

PORTFOLIO	CADENCE	PULLS	CHEAPEST FIT	PER YEAR
First sites · 5	Monthly	60	10 tier + overage	$2,750
Growing fleet · 30	Weekly	1,560	1,000 tier + overage	$38,400
Flex Load campus · 100	Daily	36,500	25,000 tier + overage	$153,750
OEM fleet · 1,000	Daily	365,000	100,000 tier + overage	$581,250

Burn past your bundle

Every pull after it bills at the next tier's rate for the rest of the term, metered monthly.

Or level up any time

Top-ups bill at your bundle's rate and end on the same date. One wallet, one renewal.

12 months plus a grace month

Reminders at months 11 and 12. At month 13 unused pulls expire and the bundle closes.

Every number stamped

Every result names the tariff version that priced it and carries its attribution.

Service

Priority queue from 500 pulls. A contractual SLA is quoted from 25,000 pulls.

Anywhere a building has a bill

Verified catalog: free. Your own rate from a bill: free and private. $25 to have WattChop verify it.

BUILD FREE. CONNECT THE MCP IN THREE LINES.

Preview pricing is guaranteed on bundles bought before Dec 31, 2026, for their full term.
